

EET-...G-4 yellow woven polyamide labels for thermal transfer printer

The EET-...G-4 labels were designed for thermal transfer printers using yellow woven polyamide with a permanent acrylic adhesive for application on irregular surfaces. The polyamide material can be used for wire and cable harness identification. Labels resist harsh chemical environments and are lightweight.

Temperature	
Operating range	0°C to +70°C
Printing information	
Printers	TE3124-Printer (thermal transfer) T200-Ident-Printer (thermal transfer)
Printing ribbon	TTB-110SC/300
