

Micro Moulded Parts, 202K111-25-01-0 (straight, lipped)

These micro moulded parts or heat shrink boots from TE Connectivity (Raychem / Tyco) are used for mechanical protection and cable strain relief. Produced in a variety of shapes and materials, the range of Raychem branded moulded shapes are supplied in an expanded form. On the application of heat, they shrink to a pre-determined size and shape, providing a tough, protective covering for the components over which they are installed. These moulded parts are with or without coating available.
